Alexandria, Va.
March 23, 1958

Dear Sir:

At about 11:30 P.M. this evening as I was returning home, I noticed a strange object in the heavens which I could not identify - nor had I ever seen anything like it before.

The light was orange to yellowish, about the brightness of "Arcturus", and about the size of a star in the handle of the Big Dipper. The object had no tail such as a comet, nor did it seem to turn up or down. It appeared in the WNW and traversed the sky in about 10-12 seconds (roughly) passing between the 2nd + 3rd stars in the handle of the Big Dipper and just north of the First Star. The object moved at a uniform rate and disappeared in the ESE.

If this report is of any value or if you know what the object was I would appreciate hearing from you.

Sincerely,
~~_____~~

REMARKS

1. Suggested reply to letter from general public.

a. Note of thanks for reporting.

b. A check of earth satellite orbital tracks indicate the object seen was not Sputnik.

c. Although the object has not been conclusively identified as yet, we are of the opinion that it probably was a meteor.

d. The report will be used as part of our continuous study and investigation of aerial phenomena.

Dear Mr. [REDACTED]

Thank you for your letter of 23 March 1958 concerning an unidentified flying object.

A check of earth satellite orbital tracks indicate the object was not a satellite.

Although the object has not been conclusively identified, a tentative analysis indicates that it probably was a meteor.

Your report will be used as a part of our continuous study and investigation of aerial phenomena.

Sincerely,

LAWRENCE J. TACKER
